HOW TO USE THIS CATALOGUE

UNDERSTANDING THE SYMBOLS

Product illustration

Product reference

Product colour

All the designs shown can be customized using the colours on page 10.

Symbols (see below)

THICKNESS

Thickness varies from one format to another. We recommend selecting formats of same thickness if different patterns or formats are to be combined on the same surface.

SLIP STANDARDS

Our tile slip rating is assessed using two types of standard (DIN 51130 and DIN 51097). The R value is used when footwear is worn, whereas the A/B/C value is important for wet rooms (bathrooms or swimming pools) where people walk in bare feet.

Slip rating wearing footwear

- R9 Normal adherence
- R10 Medium adherence
- R11 High adherence
- R12 Very high adherence

Slip rating in bare feet

- A Medium adherence
- B High adherence
- C Very high adherence

SUPPLY TYPE

Mesh-mounted

Indicates that a design is supplied pre-assembled on sheets (using fibre or paper) for easier laying.

Loose

Order supplied as loose tiles.

GROUT SIZE

Indicates the standard grout size in mm.

Some designs and borders are prepared edge to edge (0mm (0) grout line) and may not be suitable for all types of project.

THE VISUALIZER

<https://www.winckelmans.com/visualizer> 🔍

The Winckelmans visualizer is available on computers and smartphones and lets you view our tiling in your home. Take a picture of your interior, select a design and see what it looks like instantly!

ENCAUSTICS

Colour customisation

Every part of the tiles on this page can be customised using the plain colour range. Customised product pictures showing your selected colours are available on request.

Pattern creation or reproduction

We can offer much more than just the tiles shown in this catalogue, feel free to send us your requests to reproduce existing patterns. Entirely new patterns can also be created!

A history of Victorian floors

Emblematic of Victorian architecture from the 1860s, geometric tile floors became increasingly popular as they began to appear in large Victorian villas, public and religious buildings in the United Kingdom, so much so that by the 1890s, tiled floors and hallways had become an essential element of the most ordinary Victorian houses from Dover to Edinburgh.

The sign of ancestral know-how, many tiled geometric floors have survived over 150 years of wear and are as splendid today as when they were first laid.

Specialised in the restoration of these century-old floors, Winckelmans proposes an authentic range in the continuity of period production by its colours, finishes and formats, and contributes to perpetuating this heritage.

Important information

Pre-assembled modules

All our designs and borders are supplied in pre-assembled modules to make laying easier.

No standard grout space

As our designs and borders are prepared edge to edge and supplied without a standard grout width, they may not be suitable for all types of project.

Please note that the use of a grout is still needed to fill even the tiniest spaces between the individual tiles.

How to create a Victorian design

1. DESIGNS

Choose a design (pages 112 to 131).

2. BORDER

Choose a border (pages 132 to 137).

3. ANGLE

Choose a standard corner of the same width as the border (page 136).

Important note: The use of standard corners is strongly recommended for more flexibility when laying.

How to compose a Victorian border

OPTION A: BORDER WITH STANDARD CORNER

BENEFITS

Makes it possible to adapt the border to any size design.

TECHNICAL CONSTRAINTS

Requires cutting the border on each side of the corner.

Important note: The use of standard corners is strongly recommended for more flexibility when laying.

OPTION B: BORDER WITH CONTINUOUS CORNER

BENEFITS

Guarantees border continuity all around the design.

TECHNICAL CONSTRAINTS

For the corners to be harmonious in every corner, adjusting the dimensions of the central design is almost always required. More technical to lay than with standard joints.

Important note: The use of standard corners is strongly recommended for more flexibility when laying.

For unique projects

Customised service for your most specific needs

We support you throughout your project, from basic computerised simulations through to projects that require the precision and know-how of mosaic specialists. Whether it be for a genuinely unique tiles, assemblies or mosaics, we employ our teams' creativity to design your product.

Extreme customisation

Thanks to our flexibility and traditional production methods, we can meet your format, texture, colour and thickness customisation requirements.
